

Human Subjects Training Requirements: UCB Investigator

* If research is sponsored by an agency/institution that follows the NIH standards, the NIH training requirements apply.

** Course most germane to research to be conducted.

*** If conducting FDA-regulated research, *all* UCB investigators must complete and pass the CITI basic course biomedical sequence (Group 1).

Note: With certain exceptions, completion of the appropriate human subjects curriculum is a one-time requirement. Sponsor-driven requirements (e.g., DoD/DoD-related unit such as Army, Navy, Air Force) may stipulate completion of refresher training.

Human Subjects Training Requirements: UCB Research Personnel
